Part I.A.8.a	Industrial and High-Risk Runoff — Identification of Priorities and Procedures	-							
 Continue to maintain an up-to-date inventory of all existing high risk facilities discharging into the permittee's MS4. The inventory shall identify the outfall water body into which each high risk facility discharges. For the purposes of this permit, high risk facilities include: Operating municipal landfills; Hazardous waste treatment, storage, disposal and recovery facilities; Facilities that are subject to EPCRA Title III, Section 313 (also known as the Toxics Release Inventory (TRI) maintained by the U.S. EPA); and Any other industrial or commercial discharge that the permittee determines is contributing a substantial pollutant loading to the permittee's MS4. include facilities identified through the proactive inspection program as per Part III.A.7.c of the permitt. 									
	Report on the high risk facilities inventory, including the type and total number of high risk facilities and the number of facilities newly added each year.								
	<u>DEP Note:</u> The TRI is updated every spring / summer by the U.S. EPA at www.epa.gov/triexplorer. Select "Facility" on the left, chose your Geographic Location, and then select "Generate Report." Please indicate in Column F when (month / year) you last checked EPA's TRI for applicable facilities.								
	During Year 1 of the permit, develop and implement a written plan for conducting inspections of high risk facilities to determine compliance with all appropriate aspects of the stormwater program. While the permittee may determine the order and frequency of the inspections, the permittee shall inspect each identified facility at least once during the permit term; however, facilities identified as high risk due to the findings of the proactive inspection program as per Part III.A.7.c of the permit shall be inspected annually. Report on the high risk facilities inspection program, including the number of inspections conducted and the number and type of enforcement action taken.

BMAP Reporting

MS4 permittees are NOT required to submit the annual report required by any BMAP that applies to them since the NPDES Stormwater Staff can obtain them from the department's Watershed Planning and Coordination staff. However, to assure that the stormwater staff are aware of which BMAPs apply to the MS4 permittees and when the latest BMAP annual report was submitted, please complete the information below, if applicable:

Rule/Permit Citation	BMAP Title: No BMAP has been developed in Palm Beach County. A BMAP is currently underway for Lake Okeechobee Basins.	Date BMAP Annual Report Submitted to DEP
