A.	<p><b>Part II.A.1 Structural control inspection and maintenance</b></p> <p>Strengths: Proactive maintenance planning continues to be extremely beneficial for substantial removal of pollutants that would enter our local waterways if left untreated.</p> <p>Weaknesses: None. Given the quantity Lake Worth has, constant and efficient inspections and maintenance are performed successfully.</p> <p>SWMP Revisions to address deficiencies: Retention systems, Detention systems, and French drains continue to be monitored more often than in previous years.</p>
	<p><b>Part II.A.2 Significant redevelopment</b></p> <p>Strengths: Lake Worth has a stringent site plan review process lead by a committee consisting of staff from Public Services, Utilities, the Building Department, Code Compliance, and Community Sustainability. Proposed additions or modifications to new or redeveloped sites are reviewed during this process. Project proposers are also informed of what Best Management Practices will be expected of them prior, during, and post construction activity. Daily inspections are also performed throughout the project to ensure that this BMPs are adhered to.</p> <p>Weaknesses: None</p> <p>SWMP Revisions to address deficiencies: None</p>
	<p><b>Part II.A.3 Roadways</b></p> <p>Strengths: The City of Lake Worth has a weekly street sweeper schedule that is intently followed. Also, the City has various trash receptacles along its roadways, parks, and beach. Another portion of the management program, which requires the Grounds Department to systematically remove trash before receptacles overflow and present an opportunity for debris to wash into a storm drain, continues to visibly shown a reduction in pollution found in the system during treatment.</p> <p>Weaknesses: Weather during the Spring and Summer months often times derails the schedule.</p>

**SECTION VIII. EVALUATION OF THE STORMWATER MANAGEMENT PROGRAM (SWMP)**

	SWMP Revisions to address deficiencies: None
<b>Part II.A.4 Flood control</b>	Strengths: Lake Worth has a stringent site plan review process lead by a committee consisting of staff from Public Services, Utilities, the Building Department, Code Compliance, and Community Sustainability. Proposed additions or modifications to new or redeveloped sites are reviewed during this process and proposers are made aware of Lake Worth's engineering design standards and stormwater requirements. Also, the 2012 Lake Worth Stormwater Master Plan identified locations where flood control was imperative and outlined projects that would alleviate these areas. In addition, City staff is working with FDOT to address their outfalls at the Intracoastal Waterway at the base of the bridge. This is one of the severe flooding areas in the City when heavy rainfall mixes with high tide cycles due to the existing drainage systems being overfilled. To eliminate the effects of the tidal backflows in to the system, FDOT has agreed to install flap gate structures. This project is scheduled to commence in April 2015.
	Weaknesses: Due to financial constraints, many of the projects identified in the Stormwater Master Plan have yet to be completed. Utilizing the information in the master plan, however, a sequential list of problem areas was generated by City staff. This list is used during heavy rainfall events to strategically prioritize locations that need to be addressed in order to minimize flooding.
	SWMP Revisions to address deficiencies: Utilization of a list that delineates areas which must be addressed during times of heavy rainfall.
<b>Part II.A.5 Waste TSD Facilities</b>	Strengths: The City of Lake Worth has no facilities that apply.
	Weaknesses: N/A
	SWMP Revisions to address deficiencies: N/A
<b>Part II.A.6 Pesticide, herbicide, fertilizer application</b>	Strengths: The Lake Worth Fertilizer Friendly Use Regulations (Code of Ordinances, Chapter 12, Article 8) and the Pesticide, Herbicide, and Fertilizer Application Log continue to be advantageous in tracking, recording, and scheduling. The City has the ability to customize work schedules which will meet the demand of the seasons.
	Weaknesses: The weakness would be if for some reason the City's Fertilizer Friendly Use Regulations and maintenance plan are not followed. This would lead to an increase in nutrient levels in the local lagoon and waterways.
	SWMP Revisions to address deficiencies: The logs are periodically checked for compliance and proper documentation.
<b>Part II.A.7 Illicit Discharge Detection and Elimination</b>	Strengths: The City's plan assists in making violators accountable for infractions and illustrates that the City is dedicated to improving water quality. Its purpose is to detect, correct, and restore any problems that may disturb the effectiveness of the MS4.
	Weaknesses: The inability to monitor for illicit-discharge 24 hours a day, 7 days a week. The plan is successful when unified with response and participation from residents & business owners.
	SWMP Revisions to address deficiencies: The City continues to train more employees on illicit discharge. Residents are also educated on what can and can't be done (as well as what to look for) by the Public Services Director at Neighborhood and District meetings. The goal this year, as every year, is to get more people educated through awareness.
<b>Part II.A.8 High Risk Industry Runoff</b>	Strengths: The inspection plan for meeting any compliance is very detailed. Any potential for run-off or exposure is minimized by having this comprehensive plan.
	Weaknesses: None
	SWMP Revisions to address deficiencies: None

**SECTION VIII. EVALUATION OF THE STORMWATER MANAGEMENT PROGRAM (SWMP)**

<b>Part II.A.9 Construction Site Runoff</b>	Strengths: There is daily monitoring by the Public Services Project Manager prior to, during, and post construction to ensure work is in accordance with the requirements and that proper Best Management Practices are being utilized at all the times.
	Weaknesses: None
	SWMP Revisions to address deficiencies: None

### BMAP Reporting

MS4 permittees are NOT required to submit the annual report required by any BMAP that applies to them since the NPDES Stormwater Staff can obtain them from the department's Watershed Planning and Coordination staff. However, to assure that the stormwater staff are aware of which BMAPs apply to the MS4 permittees and when the latest BMAP annual report was submitted, please complete the information below, if applicable:

### Fiscal Analysis Summary

The 4,459,612 expenditure listed in the previous reporting year 10/2012-9/2013 include Operational expenses, (C.I.P.) Capital Improvement Projects and a Stormwater Utility Reserve fund (3,000,000). This left 1,459,612 for our Stormwater program. This report period we did not include this reserve fund and our Program expenditure totals 1,923,401. Consequently we had an increase in our Stormwater expenditure. These expenditures include our entire Stormwater Management Program and some Capital Improvement.
