

## ARTICLE IV. - FLORIDA-FRIENDLY FERTILIZER USE

### Sec. 32-80. - Definitions.

The following words, terms, and phrases, when used in this chapter, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning:

*Application* or *apply* means the actual physical deposition of fertilizer to turf or landscape plants.

*Applicator* means any person who applies fertilizer on turf and/or landscape plants in Town of Lake Park.

*Approved test* means a soil test from the University of Florida, government, or other commercial licensed laboratory that regularly performs soil testing and recommendations.

*Best management practices (BMPs)* means turf and landscape practices or combination of practices based on research, field-testing, and expert review, determined to be the most effective and practical site-specific means, including economic and technological considerations, for improving water quality, conserving water supplies and protecting natural resources.

*Commercial fertilizer applicator* except as provided in F.S. § 482.1562(9), means any person who applies fertilizer for payment or other consideration to property not owned by the person or firm applying the fertilizer or the employer of the applicators.

*Fertilizer* means any substance or mixture of substances that contains one or more recognized plant nutrients and promotes plant growth, or controls soil acidity or alkalinity, or provides other soil enrichment, or provides other corrective measures to the soil.

*Fertilizing* or *fertilization* means the act of applying fertilizer to turf, specialized turf, or landscape plants.

*Institutional applicator* means any person, other than a private, noncommercial or a commercial applicator (unless such definitions also apply under the circumstances), that applies fertilizer for the purpose of maintaining turf and/or landscape plants. Institutional applicators shall include, but shall not be limited to, owners, managers, or employees of public lands, schools, parks, religious institutions, utilities, industrial or business sites and any residential properties maintained in condominium and/or common ownership.

*Landscape plant* means any native or non-native tree, shrub, or groundcover (excluding turf).

*Pasture* means land managed for livestock grazing.

*Person* means any natural person, business, corporation, limited liability company, partnership, limited partnership, association, club, organization, and/or any group of people acting as an organized entity.

*Prohibited application period* means the time period during which a flood watch or warning, a tropical storm watch or warning, or a hurricane watch or warning is in effect for any portion of Town of Lake Park, issued by the National Weather Service, or if heavy rain (two inches or more within a 24-hour period) is likely.

*Saturated soil* means a soil in which the voids are filled with water. Saturation does not require flow. For the purposes of this article, soils shall be considered saturated if standing water is present or the pressure of a person standing on the soil causes the release of free water.

*Slow-release, controlled release, timed release, slowly-available, or water insoluble nitrogen* means nitrogen in a form which delays its availability for vegetative uptake and use after application, or which extends its availability to the vegetation longer than a reference rapid or quick release product.

*Turf, sod, or lawn* means an area of grass-covered soil held together by the roots of the grass.

*Urban landscape* means pervious areas on residential, commercial, industrial, institutional, highway rights-of-way, or other nonagricultural lands that are planted with turf or landscape plants. For the purposes of this section, agriculture has the same meaning as provided in F.S. § 570.02.

(Ord. No. 07-2013, § 1, 6-5-2013)

Sec. 32-81. - Findings.

As a result of the Florida Department of Environmental Protection's (FDEP) determination that certain water bodies within Palm Beach County are impaired for excessive nutrient levels, the town finds that the best management practices contained in the most recent edition of the "Florida-Friendly Best Management Practices for Protection of Water Resources by the Green Industries," should be implemented by this article. Overgrowth of algae and vegetation hinder the effectiveness of flood attenuation provided by natural and constructed stormwater conveyances. Regulation of nutrients, including both phosphorus and nitrogen contained in fertilizer, is anticipated to help improve and maintain water and habitat quality.

(Ord. No. 07-2013, § 1, 6-5-2013)

Sec. 32-82. - Purpose and intent.

These regulations are intended to provide for the proper use of fertilizers by any applicator; to require the training of commercial and institutional fertilizer applicators; to establish training and licensing requirements; to establish a prohibited application period; and to specify allowable fertilizer application rates and methods, fertilizer-free zones, and exemptions. It is also the intent and purpose of these regulations to require the use of best management practices to minimize negative environmental effects associated with excessive nutrients in the town's natural and constructed stormwater conveyances, rivers, creeks, canals, lakes, estuaries and other water bodies. Collectively, these water bodies are an asset important to the environmental, recreational, cultural and economic well-being of the residents of the town and Palm Beach County and the furtherance of the public's health, safety, and general welfare.

(Ord. No. 07-2013, § 1, 6-5-2013)

Sec. 32-83. - Applicability.

This regulation shall be applicable to and shall regulate any and all applicators of fertilizer and areas of application of fertilizer to urban landscapes within the town, unless such application is specifically exempted as provided for herein.

(Ord. No. 07-2013, § 1, 6-5-2013)

Sec. 32-84. - Timing of fertilizer applications.

- (a) No applicator shall apply fertilizers containing nitrogen and/or phosphorus to turf and/or landscape plants during the prohibited application period or to saturated soils.
- (b) Fertilizer containing nitrogen and/or phosphorus shall not be applied before seeding or sodding a site, and shall not be applied for the first 30 days after seeding or sodding, except when hydro-seeding for temporary or permanent erosion control in an emergency situation (wildfire, etc.), or in accordance with the stormwater pollution prevent plan for that site.

(Ord. No. 07-2013, § 1, 6-5-2013)

Sec. 32-85. - Fertilizer free zones.

Fertilizer shall not be applied within ten feet, or three feet if a deflector shield or drop spreader is used, of any pond, stream, water body, lake, canal, or wetland as defined by Chapter 62-340 of the Florida

Administrative Code or from the top of a seawall or lake bulkhead. Newly planted turf or landscape plants may be fertilized in this zone only for a 60-day period beginning 30 days after planting if needed to allow the vegetation to become well established. Caution shall be used to prevent direct deposition of fertilizer into the water.

(Ord. No. 07-2013, § 1, 6-5-2013)

Sec. 32-86. - Fertilizer content and application rates.

- (a) Fertilizers applied to turf within town shall be applied in accordance with requirements and directions provided by Rule 5E-1.003(2), Florida Administrative Code, Labeling Requirements For Urban Turf Fertilizers. Under Rule 5E-1.003(2), Florida Administrative Code, the required application rate and frequency maximums, which vary by plant and turf types, can be found on the labeled fertilizer bag or container.
- (b) Nitrogen or phosphorus fertilizer shall not be applied to turf or landscape plants except as provided for hereinabove, or in UF/IFA recommendations for landscape plants, vegetable gardens, and fruit trees and shrubs, unless a soil or tissue deficiency has been verified by an approved test.
- (c) Fertilizer used for sports turf at golf courses shall be applied in accordance with the recommendations in "Best Management Practices for the Enhancement of Environmental Quality on Florida Golf Courses," published by the FDEP, dated January 2007, as amended. Fertilizer used at park or athletic fields shall be applied in accordance with Rule 5E-1.003(2), Florida Administrative Code.

(Ord. No. 07-2013, § 1, 6-5-2013)

Sec. 32-87. - Fertilizer application practices.

- (a) Spreader deflector shields shall be used when fertilizing via rotary (broadcast) spreaders. Deflectors must be positioned such that fertilizer granules are deflected away from all impervious surfaces, fertilizer-free zones and water bodies, including wetlands. Any fertilizer applied, spilled, or deposited, either intentionally or accidentally, on any impervious surface shall be immediately and completely removed to the greatest extent practicable.
- (b) Fertilizer released on an impervious surface shall be immediately contained and either legally applied to turf or any other legal site, or returned to the original or other appropriate container.
- (c) In no case shall fertilizer be washed, swept, or blown off impervious surfaces into stormwater drains, ditches, conveyances, or water bodies.
- (d) Property owners and managers shall use an integrated pest management (IPM) strategy as currently recommended by the University of Florida Cooperative Extension Service publications.

(Ord. No. 07-2013, § 1, 6-5-2013)

Sec. 32-88. - Management of grass clippings and vegetative matter.

In no case shall grass clippings, vegetative material, and/or vegetative debris intentionally be washed, swept, or blown on to or into stormwater drains, ditches, conveyances, water bodies, wetlands, sidewalks or roadways.

(Ord. No. 07-2013, § 1, 6-5-2013)

Sec. 32-89. - Exemptions.

The provisions set forth above shall not apply to:

- (1) Bona fide farm operations as defined in the Florida Right-to-Farm Act, F.S. § 823.14.
- (2) Other properties not subject to or covered under the Florida Right-to-Farm Act that have pastures used for grazing livestock.
- (3) Any lands used for bona fide scientific research, including, but not limited to, research on the effects of fertilizer use on urban stormwater, water quality, agronomics, or horticulture.

(Ord. No. 07-2013, § 1, 6-5-2013)

Sec. 32-90. - Training.

- (a) All commercial and institutional applicators of fertilizer within the town shall abide by and successfully complete the six-hour training program in the "Florida-Friendly Best Management Practices for Protection of Water Resources by the Green Industries" offered by the FDEP through the University of Florida/Palm Beach County Cooperative Extension Service "Florida-Friendly Landscapes" program or an approved equivalent program.
- (b) Noncommercial and noninstitutional applicators not otherwise required to be certified, such as private citizens on their own residential property, are encouraged to follow the recommendations of the University of Florida/IFAS "Florida-Friendly Landscape Program" and label instructions when applying fertilizers.

(Ord. No. 07-2013, § 1, 6-5-2013)

Sec. 32-91. - Licensing of commercial applicators.

- (a) All businesses applying fertilizer to turf or landscape plants (including, but not limited to, residential lawns, golf courses, commercial properties, and multi-family and condominium properties) must ensure that the business owner or his/her designee holds the appropriate "Florida-Friendly Best Management Practices for Protection of Water Resources by the Green Industries" training certificate prior to the business owner obtaining a local business tax certificate. Owners for any category of occupation which may apply any fertilizer to turf and/or landscape plants shall provide proof of completion of the program to the town's business registration office. It is the responsibility of the business owner to maintain the "Florida-Friendly Best Management Practices for Protection of Water Resources by the Green Industries" certificate to receive their business tax receipt annually.
- (b) After December 31, 2013, all commercial applicators of fertilizer within town shall have and carry in their possession at all times when applying fertilizer, evidence of certification by the Florida Department of Agriculture and consumer services as a commercial fertilizer applicator per Rule 5E-14.117(18), Florida Administrative Code.
- (c) All businesses applying fertilizer to turf and/or landscape plants (including, but not limited to, residential lawns, golf courses, commercial properties and multi-family and condominium properties) must ensure that at least one employee has an appropriate "Florida-Friendly Best Management Practices for Protection of Water Resources by the Green Industries" training certificate prior to the business owner obtaining a local business tax certificate. Standard business tax receipt (BTR) and transaction fees shall apply.

(Ord. No. 07-2013, § 1, 6-5-2013)

Sec. 32-92. - Enforcement.

The provisions of this article shall be enforced by the town's code enforcement board or special magistrate pursuant to the authority granted by F.S. § 162.01, as amended and the Town Code, as amended. Failure to comply with these regulations shall constitute a violation and shall be a separate violation for each new day the violation continues to exist.

(Ord. No. 07-2013, § 1, 6-5-2013)
