

## Annual Report Form For Individual NPDES Permits For Municipal Separate Storm Sewer Systems (RULE 62-624.600(2), F.A.C.)

- This Annual Report Form must be completed and submitted to the Department to satisfy the annual reporting requirements established in Rule 62-621.600, F.A.C.
- Submit this fully completed and signed form and any REQUIRED attachments by email to the NPDES Stormwater Program Administrator or to the MS4 coordinator (<u>http://www.dep.state.fl.us/water/stormwater/npdes/contacts.htm</u>). Files larger than 10MB may be placed on the FTP site at: <u>ftp://ftp.dep.state.fl.us/pub/NPDES\_Stormwater/</u>. After uploading files, email the MS4 coordinator or NPDES Program Administrator to notify them the report is ready for downloading; or by mail to the address in the box at right.
- Refer to the Form Instructions for guidance on completing each section.
- Please print or type information in the appropriate areas below.

Submit the form and attachments to: Florida Department of Environmental Protection Mail Station 3585 2600 Blair Stone Road Tallahassee, Florida 32399-2400

SECT	ION I. BACKGROUND INFORMATION				
Α.	Permittee Name: Town of Lake Clarke Shore	S			
В.	Permit Name: Palm Beach County MS4				
C.	Permit Number: FLS000018-004				
D.	Annual Report Year: 🗌 Year 1 🛛 Year 2	🗌 Year 3 [	🛛 Year 4	🗌 Year 5	Other, specify Year:
E.	Reporting Time Period (month/year): 10 / 20	19 through 9/2	020		
	Name of the Responsible Authority: Daniel C	lark			
	Title: Town Administrator				
-	Mailing Address: 1701 Barbados Road				
F.	City: Lake Clarke Shores	Zip Code: 3340	6	County:	Palm Beach
	Telephone Number: 561-964-1515		Fax Num	per: 561-964	-0685
	E-mail Address: dclark@lakeclarke.org				
	Name of the Designated Stormwater Manage Damon Gammons	ement Program C	ontact (if di	fferent from S	Section I.F above):
	Title: Utilities Superintendent				
	Department: Public Works				
G.	Mailing Address: 1701 Barbados Road				
	City: Lake Clarke Shores	Zip Code: 3340	6	County:	Palm Beach
	Telephone Number: 561-642-7870		Fax Num	oer: 561-964	-0685
	E-mail Address: dgammons@lakeclarke.org				

SECT	ION II. MS4 MAJOR OUTFALL INVENTORY (Not Applicable in Year 1)
А.	Number of outfalls ADDED to the outfall inventory in the current reporting year (insert "0" if none): 0 (Does this number include non-major outfalls?
В.	Number of outfalls REMOVED from the outfall inventory in the current reporting year (insert "0" if none): 0 (Does this number include non-major outfalls?
C.	Is the change in the total number of outfalls due to lands annexed or vacated? 🗌 Yes 🗌 No 🖾 Not Applicable

SECT	ION III.	PART V.B. ASSESSMENT PROGRAM
А.	frequency of <u>DEP Note:</u> the interloce Name and the Cycle 4 Status: The Shores is r	orief statement as to the status of water quality monitoring plan implementation. Status may include sampling changes, monitoring location changes, or sampling waiver conditions. If permittee participates in a collaborative monitoring plan, permittee may refer to a joint response as defined by cal agreement. date of the approved plan: Current approval of the Group Monitoring Plan is September 8, 2016 (with issuance of a permit). The Assessment Plan was approved May 6, 2019. e monitoring program is carried out jointly by the PBC permittees. See the PBC Joint Annual Report. Lake Clarke elying on the Group water quality data at 37B (upstream) and 18C (downstream). These data are also graphed by Also see the attached Town of Lake Clarke Shores Water Quality Assessment Report FY19-20.
В.	monitoring <u>DEP Note:</u> See PBC	orief discussion of the monitoring and loading results to date which includes a summary of the water quality data and / or stormwater pollutant loading changes from the reporting year. <i>Results must be specific to the permittee's SWMP</i> . Joint Report and the attached Town of Lake Clarke Shores Water Quality Assessment Report FY19-20.
C.	and/or stor <u>DEP Note:</u>	onitoring data summary as required by the permit. An analysis of the data discussing changes in water quality mwater pollutant loading from previous reporting years. <i>Analysis must be specific to the permittee's SWMP</i> . ached Town of Lake Clarke Shores Water Quality Assessment Report FY19-20.

SECT	ION IV. FISCAL ANALYSIS
Α.	Total expenditures for the NPDES stormwater management program for the current reporting year: \$12,940.69
В.	Total budget for the NPDES stormwater management program for the subsequent reporting year: \$64,000
C.	Did the current reporting year resources decrease from the previous year? Y ☐ / N ⊠ If program resources decreased, provide a discussion of the impacts on the implementation of the SWMP. Expenditures = \$3,998.69 fees + \$8,942.00 repairs & maintenance = \$12,940.69 Budget = \$4,000 NPDES + \$60,000 Stormwater = \$64,000

#### SECTION V.

## MATERIALS TO BE SUBMITTED WITH THIS ANNUAL REPORT FORM

Only the following materials are to be submitted to the Department along with this fully completed and signed Annual Report Form (check the appropriate box to indicate whether the item is attached or is not applicable):

Attached	<u>N/A</u>	Required Attachments	Permit Citation	Attachment Number/Title
		Any additional information required to be submitted in this current annual reporting year in accordance with Part III.A of your permit that is not otherwise included in Section VII below.	Part III.A	
	$\boxtimes$	An explanation of why the minimum inspection frequency in Table II.A.1.a. was not met, if applicable.	Part II.A.1	
		A list of the flood control projects that did not include stormwater treatment and an explanation for each of why it did not (if applicable).	Part III.A.4	
		A monitoring data summary as directed in Section III.C above and in accordance with Rule 62-624.600(2)(c), F.A.C.	Part V.B.3	See Joint Annual & Town's Assessment Reports
	$\boxtimes$	YEAR 1 ONLY: An inventory of all known major outfalls and a map depicting the location of the major outfalls (hard copy or CD-ROM) in accordance with Rule 62-624.600(2)(a), F.A.C.	Part III.A.1	
	$\boxtimes$	YEAR 2: A summary review of codes and regulations to reduce the stormwater impact from development.	Part III.A.2	
		Year 3 ONLY: The estimates of pollutant loadings and event mean concentrations for each major outfall or each major watershed in accordance with Rule 62-624.600(2)(b), F.A.C.	Part V.A	See Joint Annual & Town's Assessment Reports
	$\boxtimes$	YEAR 3: Summary of TMDL Monitoring Results (if applicable).	Part VIII.B.2	
	$\boxtimes$	YEAR 3: Bacteria Pollution Control Plan (if applicable).	Part VIII.B.3	
		YEAR 4: A follow-up report on plan implementation of changes to codes and regulations to reduce the stormwater impact from development.	Part III.A.2	Conclusion from Cycle 4 Year 2 was no change needed
	$\square$	YEAR 4: A report on any amendments to the applicable legal authority (if applicable).	Part III.A.7.a	No changes are neede
		<ul> <li>YEAR 4: Permit re-application information in accordance with Rule 62-624.420(2), F.A.C.</li> <li>The monitoring plan (with revisions, if applicable).</li> <li>If the total annual pollutant loadings have not decreased over the past two permit cycles, revisions to the SWMP, as appropriate.</li> </ul>	Part V.B.3 Part V.A.3	Refer to year 4 Joint Report
	$\boxtimes$	YEAR 4: TMDL Supplemental SWMP (if applicable).	Part VIII.B.3	

#### DO NOT SUBMIT ANY OTHER MATERIALS

(such as records and logs of activities, monitoring raw data, public outreach materials, etc.)

### SECTION VI. CERTIFICATION STATEMENT AND SIGNATURE

The Responsible Authority listed in Section I.F above must sign the following certification statement, as per Rule 62-620.305, F.A.C:

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based upon my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Name of Responsible Authority (type or print): Daniel Clark

			(Year 3 AR)	(Year 4 AR; N/A if BPCP)						
C.	Provide a b	rief statement as to t	the status of TMDL i	mplementation accord	ding to Part VIII.B of	the permit (e.g. statu	s of monitoring to v	alidate WLA):		
	No discharge to a TMDL WBID at the time of permit issuance.									

# TOWN OF LAKE CLARKE SHORES MS4 Permit No. FLS000018-004 Water Quality Assessment Report FY19-20

The Town of Lake Clarke Shores MS4 is almost all single family residential with some Town facilities. There is commercial along Forest Hill Boulevard, however these facilities are private and drain into the Palm Beach County system. As the Town was developed over 50 years ago, the drainage system is comprised of many drainage outfalls into the LWDD canals that run through the Town or into Lake Clarke both of which discharge to the SFWMD C-51 Canal that borders the Town on the east. Of these Town outfalls only 4 are NPDES outfalls. As the LWDD, private, and Town systems interconnect through Lake Clarke and the LWDD canals; any water quality monitoring would have to be at the storm drain outfalls during a storm event. As these MS4 discharges are serving single family residential and Town facilities, low pollutant loading rates are typical. Due to the aforementioned facts, the Town of Lake Clarke Shores is relying on the group data and report.

# Water Quality Monitoring

There are several LWDD canals that flow through Lake Clarke Shores. Lake Clark is a "Water of the State" just to the west of SFWMD's major outfall (S-155) from the C-51 Basin. C-51 discharges to the central section of the LWL and flow can be either to the north to the Palm Beach Inlet or south to Boynton Inlet, although Boynton inlet is closer. The upstream station is in the C-51 Canal at SR7 and is 37B. There are numerous downstream stations, the closest being 18C.

A map of the PBC monitoring locations is attached for reference. Also attached are the results of the monitoring in graphs for TN, TP, and Chlorophyll-a for both locations upstream (37B) and downstream 18C.

The upstream TN at 37B is trending down at a slope of 0.0001 and the downstream TN is also trending down at 18C at a slope of 0.0001. The net TN trend is not only downward but the lower values at 18C as compared to 37B through Lake Clarke Shores indicates the TN is diminishing.

The upstream TP at 37B is trending down at a slope of 0.000002 to 0.000003 (essentially flat) and the downstream TP is essentially flat at 18C. The net TP trend is not changing or going down slightly.

The upstream Chlorophyll-a at 37B is steady and trending slightly up or down according to the analysis technique utilized and the downstream Chlorophyll-a is trending slightly down at 18C. It appears Chlorophyll-a essentially steady.

# Pollutant Loading Estimate (same as 2019)

The Town of Lake Clarke Shores is relying on the Group Report. The Group developed pollutant loading estimates during the 3<sup>rd</sup> year of this permit cycle, using the SIMPLE protocol. The group provided loadings estimates "by MS4" as listed below for the 6 required water quality parameters. The results as listed below include a 6% reduction for public education as allowed by FDEP.

	$BOD_5 \sim lbs$	TSS ~lbs	TP ~lbs	Cu ~lbs	Zn ~lbs	TN ~lbs
2013	17,783	80,127	1,240	46	184	25,882
2018	16,720	75,352	1,165	44	173	24,261

The pollutant loading estimates indicate lower pollutant loadings over past two permit cycles. A majority of the pollutant loadings appears to be from non-MS4 sources (see group report). The pollutant loading estimates indicate that the current stormwater pollution prevention programs in place are generally managing the stormwater runoff in terms of pollutant loadings, and implementation of additional programs is not warranted.

# **Evaluation and Response Plan**

Both of the above analyses indicate mostly reductions in nutrients. The exception is the indicator Chlorophyll-a which is flat. It appears Chlorophyll-a is related to other factors than those represented in the aforementioned nutrient data.

As a result of the above Lake Clarkes Shores is considered to have an effective stormwater management program. Lake Clarke Shores is therefore not targeting any areas for loading reduction/corrective action.

P.A. No.: B6050.90
